

## Lab 09: ArcGIS JavaScript API

In this lab, you will use the same html used in the lecture. Your task is to add a chart that display the land cover classes surrounding solar panel.

This lab is worth a total of **65 points** and contributes **6.5%** toward the final grade

Submit this word document by midnight (11:29 PM) on November 10.

Requirements:

When the user clicks on the polygon,

- The popup window displays the selected field in a table format
- The popup window should also include a chart that visually represents the land cover classes.

Sample code from ArcGIS JavaScript API Documentation:

<https://developers.arcgis.com/javascript/latest/sample-code/popup-multipleelements/>
